**Subject:** FW: Superfund Resource Analysis  
**Attachments:** SF 101 for SLT 030615b-ss.docx

Hi Sandy. Some minor suggestions on the LEP stuff:

Legal Enforcement (ENF-L) - PA/SI, NPL Listing, RI/FS, RD, RA, ROD and Post Construction

Superfund involves federal administrative and judicial CERCLA actions against potentially responsible parties. Superfund requires legal and policy support to ensure regulatory compliance in the region's cleanup activities. Superfund responsibilities include analysis of PRP liability and case development, the preparation/issuance of administrative orders; preparation of judicial referrals; administrative and judicial litigation with attendant hearings; preparation of consent orders and decrees; and counseling involving NCP compliance, FOIA and Confidential Business Information issues.

All

Attached is the resource analysis that Russ developed from your workgroup discussions. Please take a look at those sections that relate to your programs (and any others if you have time) and get back to me (and Russ) with any corrections/edits by 10am Monday. I will incorporate into the document and pass on to SLT. SLT will be meeting Tuesday afternoon to begin the discussion of Superfund resources and this document will be critical to that discussion. Thank you all again for getting together and providing some options for a path forward for Superfund, and special thanks to Russ Leclerc for pulling your thoughts together in this summary. I hope this is the beginning of your continued discussion of resources and priorities for the Superfund Program.

Thanks again and stay tuned!

Sandy
